# AppleShare File and Print Services

AppleShare file and print services set the standard for networking flexibility and ease of use. Now that same ease of use has been expanded into a complete family of performance offerings. Whether you are networking a small business or a

In all its versions, AppleShare is the heart of workgroup and departmental computing. Building on the intuitive simplicity of Macintosh file sharing, AppleShare adds centralized storage and administration, higher performance, and

# AppleShare File and Print Services

Which version of AppleShare is right for you? The answer depends on the size of your workgroup and your performance needs.

**AppleShare 3** is the perfect solution for smaller workgroups, whether in business or education, that have outgrown the basic file-sharing capabilities of System 7. You can have it up and running within 15 minutes on any System 7 Macintosh. Its centralized administration and easy access to shared files make workgroup collaboration a breeze, yet it has the full-featured security needed to keep your most important data safe.

**AppleShare 4** is specially designed for 68040-based Macintosh and Power Macintosh computers and Workgroup Servers. Performance is two to three times faster than with version 3, making AppleShare 4 the fastest Macintosh-based file and print server on the market. It is the ideal choice for small or medium-sized workgroups with heavier performance demands. As easy to set up and administer as AppleShare 3, AppleShare 4 is the perfect solution for users who don't want to spend hours managing their servers, yet need the high performance

## Multiple services
▶ Supports System 7 multitasking including program linking and publish and subscribe
▶ Includes file and print servers
▶ Open environment allows additional network services

## Sharing options
▶ On-line CD-ROM exchange
▶ Either folders or entire disks can be shared
▶ Client software built into every Macintosh
▶ Easy server selection through the Chooser
▶ Intuitive, consistent access to shared resources
▶ User-controlled access to information

## Print spooling
▶ Spooling for up to five AppleTalk printers
▶ Centralized queue management
▶ Simultaneous print requests accepted
▶ Frees client workstations immediately
▶ Print log for up to 1,000 print jobs

## Administrator control
▶ Administrator-determined number of connected users
▶ Server messages can be broadcast or sent to

| Specifications | 3.0.1 | 4.0.2 | Pro |
|---|---|---|---|
| Concurrent logons | 120 | 150 | 200 |
| Open files | 346 | 346 | 5000 |
| Number of hard disks | 7 | 7 | 20 |
| Users [1] | 8,192 | 8,192 | 8,192 |
